REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims 115 are allowable over the prior art of record for at least the reason that the prior art fails
to teach or suggest a heat dissipating apparatus for an electronic device having an
integrated heat spreader, comprising: a base having a lower surface and an upper
surface, the lower surface having a contact area to contact the integrated heat spreader
when the base is disposed on the electronic device, and the lower surface having a
concave area extended to the contact area from an edge of the lower surface of the
base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The Fig. 2 or the present application, admitted by the applicant as a prior art, discloses a heat dissipating apparatus for an electronic device having an integrated heat spreader, comprising: a base having a lower surface and an upper surface, the lower surface having a contact area to contact the integrated heat spreader when the base is disposed on the electronic device, but does not comprise a lower surface having a concave area extended to the contact area from an edge of the lower surface of the base. US Patents by Lin (5,651,688) and Bright et al (5,241,453), and also Japan Patents JP402012953A by Uchida and JP405003235A by Ishikawa each teaches a heat dissipating apparatus for an electronic device having an integrated heat spreader.

comprising: a base having a lower surface and an upper surface, the lower surface having a contact area to contact the integrated heat spreader when the base is disposed on the electronic device, and the lower surface having a concave area. However, each of them teach said concave area extended through said contact area from one edge of the lower surface of the heat sink to another, instead of extending to the contact area from an edge of the lower surface of the base.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Datskovskiy whose telephone number is (571) 272-2040. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on (571) 272-2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
